Green Beginning Community Preschool

“Los Koalitas” Spanish Immersion Program

Established in 2015, The Koalitas is taught entirely in Spanish by native speakers of the language, this class will give your child the opportunity to learn a new language in a fun, safe, nurturing environment.

Green Beginning is pleased to offer a Spanish Immersion class for children ages 2 and up. This class follows the philosophy and structure of the rest of our school with one important exception- it is conducted entirely in Spanish! Curriculum will be offered to the children in a natural manner, giving them exposure to the second language and the opportunity to begin using that language themselves.

Their interest in the new language and culture will be sparked through fun and meaningful activities such as music, art, cooking, and more.

- The class meets Monday through Friday, 12:30pm- 3:00pm.
- Enrollment all five days is required in the last year of preschool in order to ensure fluency and mastery of the language.

Knowing a second language will set your child up for success later in life. Research has shown that bilingual children perform better in science and math, develop sharper analytical skills, and have greater neural activity in the areas of the brain associated with memory, attention, and literacy. Not to mention that people who speak a second language are open to a world of opportunities, especially in a city such as Los Angeles, which has a diverse population of Spanish speakers from all over the world.

You may have heard that children learn languages more easily and fluidly than adults. This is true- a young child's brain is wired to pick up the sounds and structures of language, and the younger that a child is exposed to a language the better that language is learned. It is never too early to start teaching our children a second language!
